

DAVIT ARM

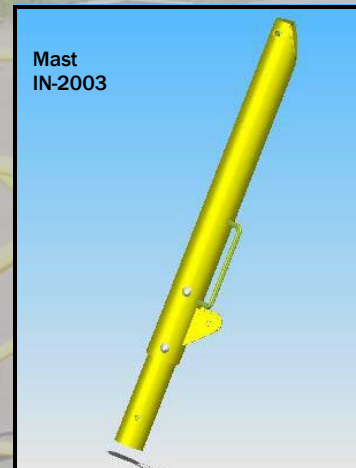

This extendible davit arm will facilitate your access to underground chambers and any other restraint access. Light, reliable and easy to install in conjunction with barricade # IN-2001, mast # IN-2003 and other special applications. It's weight of only 23 lbs gives you a capacity of 360lbs 10:1 safety factor. It also provides you 5000lbs anchor point following safety regulations. Meets or exceeds (CSA – OSHA – CSST) regulations.

MAST

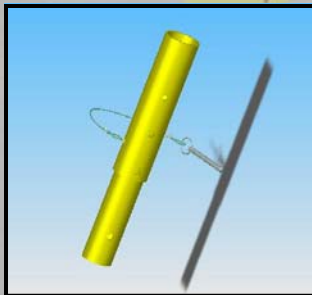

This mast was conceived to be use in conjunction with Davit Arm # IN-2002 and fits all of our permanent or mobile adapters. The mast is made of aircraft industry aluminum and is very light and durable. Weighing only 22lbs the unit can be use in restraint spaces where a versatile and reliable rescue, entry/retrieval system is needed.
